EXPERIENCE

BucleLabs Pvt. Ltd. Feb 2024 – Present

Frontend Developer *Gurugram*

- Developed user interfaces with **Next.js**, **React.js**, **TypeScript**, **Material UI** and **Tailwind CSS**, using **Redux** for state management. Executed **API integration** using Redux Thunk for asynchronous actions, ensuring efficient data flow. Ensured cross-browser compatibility and responsiveness through thorough testing and debugging.
- **Coordinated with Backend and UI/UX** teams to resolve bugs, define requirements, and develop responsive, user-friendly components.

Ballzo India Pvt. Ltd. Oct 2023 – Dec 2023

Frontend Developer(Intern) *Delhi*

- Devised a mobile-friendly web app for 30,000+ football players to book ground slots and process payments via RazorPay. State and City dropdown, image compressor and **SEO** optimization.
- Built and published an Angular library for reusable components and models and used it in the app.

PROJECTS

EduBlock | Live | *Next.js, React.js, Mui, Tailwind, Redux Toolkit*

- Constructed a **responsive** website layout for all platforms, ensuring optimal performance across various devices.
- Developed a **Stepper** form with custom headers for bulk students onboarding via CSV file upload.
- Managed API calls and data management using **Redux Toolkit**, displaying data in multiple tables with **pagination**, **search** and **filter**.
- Built an institution creation dialog form box to capture name, email, phone using react-phone-input-2 library and image using React **Dropzone**. Used **Formik** and **Yup** for form validation.
- Developed a responsive **login** form with API integration and **OTP** verification for password management.
- Created a page for Super Admin to define roles and permissions with React Switches, controlling user access.
- Constructed a department dropdown that fetches all departments assigned to user via API on login. Switching updates a global department ID in Redux, dynamically updating data in subsequent API calls.
- Added **Dialog** boxes confirmation, **Popover** for user details and logout and React **Toast** for notification.

Bucle Website | Live | *Next.js, React.js, Mui, Tailwind, Redux Toolkit*

- Designed and implemented responsive Expertise and Hire Developers pages featuring dynamic content, including a **hero section**, **FAQs**, a Contact Us form, and a development process **grid** with appealing **gradients** and images.
- Created a responsive blog layout with search, blog views, and recent posts, managing state using **React Context**.
- Developed a responsive, visually appealing **header** and **footer**, ensuring a seamless experience across devices.
- Built sections like a Sprint section with grids, team **carousel**, dialog form for user details, **Skeleton** loader.

Goldy | Live | *Next.js, React.js, Mui, Tailwind, Redux Toolkit*

- Built a visually appealing **transaction progress loader** dialog showing the current step, spinning coin animation, facts slider, and countdown timer. Displays success or failure messages based on the response.
- Enhanced the homepage with navigation buttons, embedded a YouTube video using **YouTubeEmbed** in both the dialog and homepage, improved SEO, and addressed various UI bug fixes for better functionality.
