EXPERIENCE 2 YEARS

SecurePay Pvt. Ltd.

Mar 2025 – Present

Software Developer

Dehradun

- Led end-to-end development of SecurePay's **Payin** and **Payout** portals, building scalable onboarding flows, reusable UI components, and secure AWS-powered integrations for a seamless user experience.
- Collaborated closely with **Backend**, **UI/UX**, **DevOps**, **QA** and **Product** teams to drive product development, resolve cross-functional dependencies, and ensure timely, bug-free feature delivery.

BucleLabs Pvt. Ltd.

Feb 2024 – Oct 2024

Frontend Developer

Gurugram

- Developed pages and user interfaces using **Next.js**, **React.js**, **TypeScript**, **Material UI**, and **Tailwind CSS**, managing state with **Redux** and executing **API integrations** via Redux Thunk for efficient data flow, while collaborating with Backend and UI/UX teams to resolve bugs and build responsive components.

PROJECTS

SecurePay Portal | [Live](#) | [Live](#) | *Next.js, React.js, Mui, Redux Toolkit, AWS, Axios, NodeJs*

- Developed and themed **Payin** and **Payout** portals with improved UX/UI and **role-based** access control.
- Led development of **80+** pages, delivering **Login** and **OTP** flows and reusable UI components including **Sidebar**, **Tables**, custom pagination, search/filter dialogs, date picker, and **QR** code generation/download.
- Integrated REST APIs via **AWS API Gateway** with token-based mapping and CSRF protection.
- Implemented secure, app-wide document upload, view, and download workflows using **AWS S3Client** and **pre-signed URLs**, enabling direct, controlled access to **S3 buckets**.
- Built two merchant onboarding flows for **Payin** and **Payout** with multi-submit forms, cross-step data preservation, document uploads, and PAN, Aadhaar, GSTIN, and bank account verification using **Signzy** and **Paysprint**.

SecurePay Website | [Live](#) | *Next.js, React.js, Mui, Tailwind, Framer Motion*

- Built a fully responsive company website from scratch, including global **Header** and **Footer**, with **Chart.js** visualizations, partner bank and client carousels, interactive accordions, tabs, and **parallax** card effects.
- Developed core pages including **Home**, **Contact Us**, **Services**, **Payout**, **QR Code**, and **Sound Box**.

EduBlock | *Next.js, React.js, Mui, Tailwind, Redux Toolkit*

- Constructed a **responsive** website layout for all platforms, ensuring optimal performance across various devices.
- Developed a **Stepper** form with custom headers for bulk students onboarding via CSV file upload.
- Managed API calls and data using **Redux Toolkit**, displaying data in tables with pagination, search, and filter.
- Built an institution creation form using **Formik**, **Yup** validation, React Phone Input and **Dropzone**.
- Developed a responsive **login** form with API integration and **OTP** verification for password management.
- Created a page for Super Admin to define roles and permissions with React Switches, controlling user access.

Bucle Website | [Live](#) | *Next.js, React.js, Mui, Tailwind, Context API*

- Designed and implemented responsive Expertise and Hire Developers pages featuring dynamic content, including a **hero section**, **FAQs**, a Contact Us form, and a development process **grid** with appealing **gradients** and images.
- Created a responsive blog layout with search, blog views, and recent posts, managing state using **React Context**.
- Built responsive **header** and **footer**, sprint grid sections, team **carousels**, dialog forms, and **Skeleton** loaders.
